

GEM S. C. GROUP HAVE GOOD DANCE

(Special to The Mail)
The Gem Social Credit group held a very successful dance last Friday night, October 18, in the Gem school with an enthusiastic crowd of dancers in attendance. Among the patrons were many from Bassano, Duchesne, Rosemary and the surrounding districts who thronged to Gem to enjoy a pleasant evening of dancing to the Melody Five, an orchestra comprising the Keeling brothers, Stanley Jones and Billy Noble of Gem and Roy Gayford and Harry Holmes.

From an entertainment and financial standpoint, the venture was considered a total success.

The Social Credit group will meet in a few days, announcement of which will be made hereafter.

FEDERAL ELECTION RESULTS BY POLLS

| Poll No. | Blackfoot | Grasshopper | Wheatland |
|--------------------------|-----------|-------------|-----------|
| 1-Tarzon School | 4 | 11 | 5 |
| 12-Avalon | 4 | 11 | 5 |

MARRIAGE

MOFFAT-HOLOROYD

At 1:30 on the afternoon of October 18 the marriage at Landon was the scene of a wedding of interest to the community of Bassano, when Miss Eleanor Katherine Moffat, eldest daughter of Mrs. M. M. Moffat and the late Mr. D. D. Moffat, became the bride of Mr. Dean Holroyd, youngest son of Mr. and Mrs. George Holroyd of Warner, Alberta. Rev. H. E. Gordon performed the ceremony. Mrs. H. A. Tremblé was maid of honor and Mr. H. A. Tremblé best man. The bride was given in rich blue velvet with silver trimmings.

The wedding party left at once for Calgary for the wedding supper. Then Mr. and Mrs. D. E. Holroyd motored to Warner to spend the week with relatives there, and on Monday will leave for an extended trip to the States, with intent to visit old friends and relatives at Portland, Los Angeles, Long Beach, Portland and Spokane. When they return they will reside near Warner, where Mr. Holroyd has been a very successful farmer.

The best wishes of their many friends go with the young couple.

CHANCELLOR

CHANCELLOR, Oct. 21.—Mrs. Harry Chamney, entertained at a chicken dinner on Monday night and had as her guests Mr. and Mrs. H. F. Penke, Beulah Jane and Jimmy Penke and Mr. and Mrs. G. F. Phillips. Mr. and Mrs. Phillips, accompanied by Mrs. H. Chamney, were Calgary visitors on Wednesday. Mrs. A. Fraser spent several days in Calgary. On Tuesday her daughter and son, Betty and Fraser, moved in to their new home. Miss Ellen Hanson accompanied them on the trip.

A new furnace has been installed in the school. Mr. Michael of Glen and his assistant having charge of the work.

Miss Marjorie Grant spent the week-end in Calgary with her parents.

GEM

GEM, Oct. 22.—Mr. Grey of the E. T. H. who was to speak at the Gem school last Saturday night, will not attend a meeting there this Saturday. The meeting last Saturday was called off on account of the storm Saturday.

S. E. Selfridge, J. P. Royer and W. S. Pollock made a business trip to Brandon Monday.

Mrs. A. Hyrie was a Monday afternoon caller at the home of Mrs. Miss Joanna Knorr spent the day with Mrs. John Bergen on Tuesday.

Mr. P. L. Miller of San Francisco, with his friend, W. Kuhlmeier, left for his parents, Mr. and Mrs. A. P. Miller. They all went up to Claring Creek on Tuesday to visit Mr. and Mrs. Roy Robson.

The Gem Local O.P.A. is ordering a car of apples, so all members of the community and district who wish to get some may get fuller details from the secretary, W. A. Pollock.

Mr. C. A. Keeling, who left for England this week, together with Bert and Ethel Keeling and Miss Velma Leeson were dinner guests on Sunday at the home of Mr. and Mrs. L. Standen. Mr. Keeling, before going to England, is going to visit his son Ted in the United States.

Ken Olson of Idlewild was a visitor at the farmhouse home Sunday.

Hussar Brownies 4th Anniversary

HUSSAR, Oct. 18.—On Friday afternoon the Hussar Brownies celebrated their 4th anniversary. They met at the home of Dorothy Nelson, Tawny Owl, for their fourth birthday party. Fourteen Brownies were present, along with their mothers, Mrs. E. Anderson, Mrs. H. Croft, Mrs. D. Laile, Mrs. J. Hought, Mrs. White, Mrs. Anderson, former Tawny Owl, Miss Lois Nelson and Miss Berna Legat. In addition to the usual work, there was a guessing game for mothers, won by Mrs. Schooling, another won by Mrs. Anderson, a game for the Brownies, a peanut hunt, won by Peggy Holland, and a piano solo by Betty Nelson. A reading by Betty Nelson.

Board of Trade Deserve Support

The dance tomorrow night, sponsored by the Bassano Board of Trade should be attended by everyone in Bassano who is able to attend. It is not comprised of members who are striving for individual gain, they are citizens of Bassano engaged in various industries of which they are proud to be a part. Since its inauguration the board has raised approximately \$13,000 in Bassano every year and is now planning to start a town and surrounding district. Perhaps the most important and successful of undertakings was the town plan which is now in the making. There are other accomplishments too numerous to mention.

A large number of people regard the Board of Trade with an unfavorable viewpoint, while many are not justified to any degree. All trade boards have to undergo criticism, but the attitude of ridicule by disinterested individuals is an unfair one.

The Board at this time is low in funds. To carry on it must have something with which to work. This step into your "black-drag" tomorrow night and come out and enjoy yourself, at the same time give this organization a well-deserved boost.

DUCHESS

DUCHESS, Oct. 24.—Peterson's sale on Wednesday drew a large crowd and everything sold well. Poles and Plasmidons were auctioneers and Clarence Baitler and Irvin Wengen clerks. The Ladies' Aid served lunch during the day.

On Thursday Joe Pulaski had a sale of his evergreen trees. Very good prices. Pulaski's furnished free lunch.

A most successful and enjoyable time was had on Friday evening the 18th when the Duchess Girls' club sponsored a concert and novelty dance in the hall. The program consisted of a recitation by Jimmie Green, a burlesque by Roddy Clark, a song by Carol Wengert, a piano solo by Jean Powell, a piano duet by Mrs. Lyons and Miss Evelyn Hule, a monologue by Reg Clark, solo by Mr. Arnold, also music and songs by Miss Helen Adams. Cape, strimmers, confetti and some makers added to the enjoyment. There were young folks from Brooks, Millmont and Bassano present.

Mr. and Mrs. Peterson and Donna spent the week-end in Crowfoot with Mr. and Mrs. Paula.

Mr. and Mrs. Pulaski, Frank and Helen, left on Monday for their new home near Portland, Oregon.

A surprise party was held at the home of Mrs. Fred Sheldrick for Helen Pulaski. There were fourteen girls, schoolmates of Helen's, there. A good time was had, dainty refreshments served and Helen received a little gift by which to remember her old friends as she moves into a home and makes new friends.

"Brown yearling filly, star on forehead, right hind hoof light color, no visible brand."

We Thank Thee by EDNA JAGUES

We thank Thee God for lovely things
That really have to be used at all;
For crocuses and fairy rings
A smoky haze of early fall.
A mirage on a lonely plain,
The smell of flowers after rain.
For silver willows by a slough
Casting their image faint and still
In the clear water's polished blue;
For poplars on a windy hill,
That bend and rock the long night through,
You know the way that poplars do.

For cirrus in a sun-drenched field
A creaking windmill by the mill,
Ripe ears of corn . . . the smell of stage,
Bright calico that pollards sell,
A dim old candle of sod,
The yellow sheen of golden rod.
Wild mustard in a field of wheat,
An old man plodding down a lane,
A neighbor's light across the snow,
The quiet easing up of pain.
For a small bird with fluttering wings,
For a weak thank God . . . for meless things.

Former Bassano Girl Given In Marriage

Formerly Jeanette Powell, Daughter of Mrs. C. L. Powell

CARMANICHE — A quiet wedding was solemnized at 2 p.m. in the presence of immediate relatives in the home of Mr. and Mrs. C. L. Powell, when their eldest daughter, Jeanette, became the bride of Stephen B. Jodal, also of Carmaniche. The Rev. H. W. Farnham of the Methodist church officiated.

The bride's gown was of Venice-lace silk crepe with accessories to match and her flowers were a corsage of tallies roses and yellow chrysanthemums. The bride's train was of tulle and her flowers were a corsage of tallies roses and yellow chrysanthemums. The bride's train was of tulle and her flowers were a corsage of tallies roses and yellow chrysanthemums.

The bridegroom was attended by the bride's brother, Dale Powell. The young couple will reside in Clinton.

The Powell family resided in Bassano for some time, having been a few years ago for the States to live permanently.

ROSEMARY

ROSEMARY, Oct. 23.—Mrs. C. C. Narum, who has been in the Bassano hospital for the past week, returned home, she is reported as feeling better.

Joe Chabot was in Medicine Hat last Friday.

Many farmers of Rosemary district attended the meeting held in the school on Friday evening when E. L. Gray, manager of the E.I.D. spoke on business concerning the district.

The Girls' club are having a dance on November 8. Watch for further particulars.

Mrs. D. McLeod, Audley and Dorothy, Mrs. A. Narum and C. Narum were Bassano visitors on Friday.

Harry Akrum, Dave Enns and Mrs. Gellings drove a number of cattle to Bassano on Tuesday.

Heard 'n Seen

Alf Hansen telling Doc Keith how the latter's name got into this paper. Don't you read The Mail, Doc? Oh, well; if Doc Wilson reads our jokes, we must be satisfied as regards the profession. . . . Scotty McLaws, whom we have heard has a political leaning, has been elected because we have R.B. the only Conservative member to the commons in last week's issue. . . . a certain person looking pretty slicked up these days.

Louis Whitford, Gordon Fisk and Ted Gammon learning the art of driving dishes. . . . Irvins may have won a consolation prize, but to us the word is still "hoosy". . . . A number of people having a little difficulty trying to do-pher and translate a menu. . . . Joe Harris flinging drums of gas around with careless abandon. . . . Shorty Porter getting a kick out of trying to do-pher and translate a menu. . . . a certain person looking pretty slicked up these days.

Reed learning how the town boys play pool. . . . Mr. Moore, sans his Ford roadster with the horns, heading on the duck-hunting trail. . . . That The Mail is a scandal sheet; spice of life, you know. . . . Where is Ted Callbeck's big Austin car? . . . Roy Clines refusing to issue any statements regarding events of major importance.

We are sorry to report that Mrs. Charles Rodhouse is a patient in the Bassano hospital. Her many friends wish her a speedy recovery.

Mr. and Mrs. P. Holian, Doris and Vera, were dinner guests at the Hef-flower home on Sunday.

Robert Mullen is departing for Lomond on Tuesday of this week, where he plans to make his future home. J. Hanna is the proud possessor of a 1935 Willys.

Mr. and Mrs. E. W. Campbell and son Veri and Bev Monkman were dinner guests at the Robertson home on Sunday.

Ed. Note—We thank the writer for the foregoing and request that he communicate with us. It is not our policy that we accept unsolicited communications except in the case of regular contributors. We hope you will continue but we must know the contributor.

Local Couple Celebrate Silver Wedding Ann'y

Mr. and Mrs. J. Rathbone celebrated their twenty-fifth wedding anniversary on Sunday, the 20th of October, a large number of friends and relatives being in attendance.

Mr. and Mrs. Rathbone were married at St. James Church, Warrington, England, coming to Bassano in 1912, where they have resided ever since. They were the recipients of many beautiful gifts.

Many Refinements in Ford V-8 Cars for 1936

FORD V-8 CARS for 1936 feature a completely new exterior treatment with new head and fender styling, new grille and headlamps, new wheels and many detail refinements. Interiors are new with the style and color of instrument panel and moldings to harmonize with upholstery, trim and appointments. Quiet helical gears are now used in all forward speeds and reverse. Steering effort is estimated to be reduced more than 25 per cent. ABOVE—The Tudor touring sedan, with commodious built-in trunk. Note the new wheels with 12½-inch hub caps and the longer body lines. INSET—The redesigned front end. Streamlining steps ahead. Fenders have a sweeping inward flare and horns are now carried behind grilles in the fenders. Hood louvers are newly styled.

See . . . Roy Smith

LOCAL FORD DEALER, FOR THE NEW 1936 FORD

Program Of Laboratory And Field Work Investigation of Minerals In Canada

Realizing the value of modern methods and technique in mining operations, the Canadian Department of Mines has in full swing a program of laboratory and field work involving investigations that will affect all branches of Canada's mineral industry. Laboratory tests and experimental work are under way that relate to such distinctly separate fields of endeavour as the greater utilization of Canadian coals in the domestic markets, the reviving of ore treatment processes for use in Canada's new gold mills and the improvement in quality of ceramic ware.

The field program is equally broad in scope. Officers have been placed in strategic areas to gain first-hand information on the varied activities of the industry. Field work also includes a survey of the mineral industry in Ontario and British Columbia; a field study of the fire clay, and other high quality, clay minerals in certain areas in Northern Ontario; a study of the industrial mineral situation in Quebec, the Prairie Provinces, and British Columbia; a survey of industrial waters in Ontario and Quebec; and the investigation in Ontario of mineral products used for bricks, tiles, mineral fillers, and blast-furnace slag.

The heavy volume of tests and experimental work on gold ore continues as the feature of activities in the ore dressing and metallurgical laboratories. Treatment processes have been devised for the extraction of the gold milling plants that have entered production during the year. Much of the work is in the nature of microscopic studies of mineral grains, tests on ores and ore products from established gold producers. Test work on base metal ores has been confined largely to the development of new metallurgical processes for properties with proven ore reserves, and to problems relating to higher metal recoveries at established producing concerns.

Corrosive investigations are mostly in the nature of laboratory tests and experiments. With the keen competition existing at present, manufacturers are making every effort to improve their wares in order to stimulate sales. The facilities of the laboratories are being utilized more and more due to the greater use in the industry of scientific principles, the introduction of new processes, and the development of new products.

Judging By Signs

Prospect For Long And Hard Winter In Manitoba

Manitoba's going to have a long hard winter this year and it's coming earlier than usual, according to the folks who cast their eyes around about this time each year, seeking nature's portents of the season ahead.

Winter will come early this year, these nature lore expounders declare and point to the fact that the Canada geese returned to the prairies before the full of the last moon, which always indicates an early winter. Other signs are the flocking of the ducks to the prairie stubble fields long before cold weather and the busy squirrels storing up large quantities of food.

The weather prophet after gravely considering the mud chimney houses of the crawfish, better known as crabs, along the margins of ponds and sloughs, declare that this year the little stucco dwellings are bigger than usual. This, say the observers, indicates a cold winter.

New Traffic Order

London Motorists Must Not Swerve To Avoid An Animal

England's humane societies are up in arms over the traffic ministry's latest order that motorists must not in any circumstances swerve to avoid an animal.

The order was issued after a motorist, fined \$50 for dangerous driving, pleaded he had swerved to avoid a dog. "A motorist who does so is an utter fool—who he does not know what human lives he might endanger," said the order.

Owners of pets have sought to have the edict modified, arguing that a driver could in many instances dodge an animal without endangering traffic.

A useful export outlet for Canadian dressed poultry has been opened up in the British West Indies, 100 boxes having gone forward during the first week of August.

Gold mining centres in Soviet Russia now number 1,300.

Barley For Growing Lambs

A Good Way Of Marketing Low Grade Grain

One of the best ways of marketing low grade and weedy whole grain is through sheep, either by fattening or wintering the sheep. Soudrow silage is a very valuable supplement to the ration when fattening lambs, but in the tests outlined here the only roughage used was oat straw. Three tests have been conducted at the Dominion Experimental Station at Scott, Saskatchewan, in comparing barley with oats for wintering female lambs held over for breeding purposes. Two lots of fifteen lambs each were used. The lots were divided as evenly as possible, according to individual weights and breeding, and the rations were identical except that one lot received oats and the other barley. The average quantity of grain fed was only about one pound per head daily, as the lambs were not to be marketed.

The trials lasted on an average 91 days and the average gain per head was 12.14 pounds when the lambs were getting oats and 14 pounds when they were getting barley. It was observed that the gains were affected by the quality of the grain used and although barley gave higher gains in this test it appears quite probable that good quality oats would be expected to give medium or low grade barley, pound for pound, in feeding lambs. Hence, the relative price and quality of each is the chief factor in deciding which to use for feeding growing ewe lambs.

Unique Experience On Liner

Flying Fish Took Leap Through Porthole Into Cabin

Spectacular suicide of a two-foot flying fish leaped fully 100 feet out of the sea, soared through a main deck port hole and dashed its brains out against the ceiling of a stateroom on a lively tourist liner.

The incident took place on the Empress of Canada docked at Vancouver from Hawaii and the Far East.

G. H. Elliott, British military attaché from Hong Kong, and Mrs. Elliott, occupants of stateroom 154, had evidence of the occurrence for the benefit of doubters. They produced the tail and long webbed fin, pointed to unmistakable blood stains on the ceiling and told how the twin beds and carpets had been scattered with pieces of the unexpected visitor following its terrific impact.

The incident took place not far out of Hong Kong in a sea which had only a moderate chop and there was no possibility that a huge wave had lashed it up on board.

"He apparently just ran the open port and decided to leap through it," said Captain Patrick, who described the incident as unique in his 40 years of seafaring.

Another Name For Worry

Fear Enters Largely Into Our Anxiety Over Life's Problems

Measuring things by their influence on human happiness, worry must be put down in the front rank of bad habits. The evil of anxiety is that it usually concerns matters over which we are powerless.

When we can do anything about a problem, we are up and about it. When we can do nothing, we fall into the habit of brooding over things that are beyond control. That is worry.

Worry's other name is fear. Fear forms a situation in which we know that we shall not be at our best. We worry about it, and thus unfit ourselves for dealing with the situation in any of its aspects. We close the door of the mind to every sudden inspiration, every flash of courage or hope.

It is the worrier himself who takes the cup of life and with his own hands pours into it the wormwood and the gall.—Rochester Times-Tribune.

Race Track For Ethiopia

Emperor Haile Selassie of Ethiopia is going to build a race track despite war threats and wants to know how French pari-mutuels operate. The French Racing Association received a letter from the emperor asking full details, which were sent him.

Discovery of the most powerful force man has ever produced, which penetrates a two-inch lead pipe at light dose tissue paper, was recently revealed.

MUSSOLINI: "PEACE? YES! I'M LISTENING!"
—News of the World.

Kept In Circulation

Tunnel Officials Did Not Worry About Counterfeit Coin

We've been told of a strange experience that befell a lady motoring from Atlantic through the Holland Tunnel. At the Manhattan exit, she was stopped by one of the guards, who told her that the fifty-cent piece she had just given the man at the Jersey entrance was counterfeit. The lady started to protest, but on second thought realized that she might as well pay up again and let the thing drop. But just as she was digging in her purse, a second guard came out of the change booth. "Never gave in this test. It appears quite probable that good quality oats would be expected to give medium or low grade barley, pound for pound, in feeding lambs. Hence, the relative price and quality of each is the chief factor in deciding which to use for feeding growing ewe lambs."

"The New Yorker.

Heavy Sentence For Theft

Woman In Russian Factory Executed For Stealing Chocolate

A woman worker in the Leningrad chocolate factory was sentenced to death for stealing chocolate to sell on the open market. Sentenced with the woman was her husband, who was given ten years in prison as her accomplice. Three watchmen in the factory were convicted of accepting chocolate bars as bribes and were sentenced to from one to two years' forced labor. Three other women workers who aided in the theft were ordered to spend three to seven years in prison.

Freedom Of The Press

If Mussolini did not have 100 per cent control of the press of his country, his power would be more than halved. Freedom of the press, like air and water, is not appreciated until it is no longer present, states the Houston Post. Herein Canadian motorists should remember this any time the slightest effort is made in their country to muzzle a newspaper.

Sunset pictures add interest to your snapshot album.

Did you ever stop to realize how considerate Mother Nature is of the amateur photographer? Month after month she changes the appearance of landscapes, trees, shrubs and even the skies, giving us something new to snap almost every day. Blue has now shifted her scenery to the autumn display of new flowers, colorful foliage and but not least—beautiful clouded skies to serve us with fascinating backgrounds for landscapes and sunset snapshots.

Take overlook the opportunity to capture a few of these beautiful sunsets for your snapshot album. They add interest to your picture collection and usually bring that highly rated reward—your friends' admiration. "There's a beautiful picture. How did you take it?"

An artistic sunset picture possibility is not waiting for you every night of the year. It is waiting for you the door after reading this and expect of get one. Maybe you will be so doubtful. A good sunset picture is just one of those things you watch and wait for.

You will find that a foreground of water or a background of hills will add much to the interest and artistic appearance of your sunset. By all

Sounds Quite Simple

Young Lady Tells How A Locomotive Is Made

A young lady recently visited a locomotive works and then later told some of her friends how a locomotive is made. "You pour a lot of sand into a lot of boxes," she explained, "and you throw old stove lids and things into a furnace, and then you empty the molten stream into a hole in the sand, and everybody yells and sweats. Then you pour it out and let it cool and pound it, and then you put it in a thing that bores holes in it. Then you screw it together, and paint it, and put steam in it, and they take it to a drafting room and make a blue print of it. But one thing I forgot, they have to make a boiler. One man gets inside and one man remains outside, and they pound frightfully, and they tie it to the other thing, and you need to see it go."

A Law Unto Itself

Science Has Now Yet Discovered Secret Of Genius

"We do not know where great men come from," says Dr. Alice Chard, who thinks science can eventually produce supermen. They come from the most unexpected places, and it is to be hoped nature keeps her make a boiler. One man gets inside and one man remains outside, and they pound frightfully, and they tie it to the other thing, and you need to see it go."

Guide: "This castle has stood for 600 years. Not a stone has been touched, nothing altered, nothing replaced."

Visitor: "I'm, they must have the same landlord we have."

Horse Coming Back

Use Of Horse Is On Increase In Prairie Provinces

Canada's horse population has declined greatly during the past fifteen years, due, principally, to the invasion of the motor vehicle into the field of endeavour so long ruled by the equines. Unable to compete with the speed and convenience of automobiles as a mode of transportation the horse naturally suffered in prestige, and with the adoption of power machinery on farms his sphere of usefulness became even more limited, with the result that the number of horses in Canada declined from 3, 610,494 in 1921 to 2,933,492 in 1934, notwithstanding the growth of the country during that period.

Despite the continued decline in recent years, indications point to better days ahead for "Old Ironhorse" with both horse population and demand on the increase. An estimate of the number of horses in Manitoba as at June 1935, places the horse population at 297,000, an increase of 1,000 over the preceding year. An other favourable indication is the further increase in horse-breeding activities. Horse breeders' clubs in the Prairie Provinces numbered 166 in 1934, an increase of more than 30 per cent. over the number in operation in 1933, and a number of districts report inability to secure satisfactory stallions. Imports of purebred stallions and mares of the draft breed numbered 50 in 1933, and this number was more than doubled in 1934.

Per Centage Is Small

Frut Exports Only Small Part Of Total World Trade

In few countries do fruit exports form a considerable item in the national export trade, says the Imperial Economic Committee's report on fruit. Notwithstanding the fact that in recent years the prices of fruit have fallen somewhat less than those of many commodities, exports of apples in 1933 accounted for just over two per cent. by value of Canada's total export trade, and for one and a half per cent. of the trade of Australia and of New Zealand. Normally, the proportion in these countries is about one per cent.

Pear and fresh grape exports are of negligible importance, but exports of oranges averaged 15 per cent. of the total export trade of the Republic of Honduras in 1928-32, and over 50 per cent. of the export trade of Palestine. Bananas account for over 80 per cent. of the export trade of the Republic of Honduras for about 60 per cent. of the Canary Islands' export trade, and for half the export trade of Jamaica and Cuba. The wine export trade of considerable value to Algeria and Portugal, where it accounts for about 30 and 36 per cent. respectively of the total national exports. Exports of currants are responsible for about one-fifth of the trade of Greece. The proportion of canned fruit exports exceeds one per cent. only in one country only—Malaya, a Chinese manufacturing country.

Black And White Farm

Even Livestock And Poultry Fit Into Color Scheme

A farm in La Grange, northwest of Elkhorn, Wisconsin, has been dressed up in black and white. The "farm that matches," is owned by Hugh B. Adams, a Chicago manufacturer.

The cattle are Dutch belted and the hogs are spotted Polands, both of similar black and white color combination. Two black and white goats, in polished black harness, lead the children about in a black and white wagon.

Turkeys on the farm are black and white. The chickens are black Samitras. Dogs and cats fit into the color harmony, and the hogs are ebony, with white feet and blanch faces. All farm buildings are white, trimmed in black. Fence posts, which outline the property, are white with black caps, and the trees which shade the spacious lawn are whitened out to the boughs.

Even the milk stools are white—with black underpans.

The coliseum at Rome accommodated 100,000 spectators, 87,000 of whom were seated. Its arena measured 182 feet from side to side, and 285 feet from end to end.

Deepest spot discovered in the Atlantic Ocean is off the Rio de la Plata, estimate to be over eight miles. Deepest spot in the Pacific: off the Philippines—32,088 feet.

Highly Rust Resistant

Wheat Is Originated At University Of Saskatchewan

"Apex" is the name given a rust-resistant wheat which the University of Saskatchewan may distribute in small quantities this winter. It has been selected and increased after nine years breeding work there. Dr. J. B. Harrington, of the U. of S. announced. He considered that Apex presents a signal advance over Marquis for Saskatchewan conditions in general and particularly for the conditions such as those at the Scott Experimental Farm and north and east of Saskatoon. Thatcher, the wheat from Minnesota which is nearly as rust resistant as Apex, may outyield it under the conditions of eastern and southeastern Saskatchewan.

The new highly rust-resistant wheat originated at the University of Saskatchewan has recently been named Apex and application has been made for the variety to be licensed at Saskatoon and grain to be made much more extensively in 1936. It is possible that distribution of small quantities of this variety to be made during the coming winter," Doctor Harrington said.

The new variety, which, until recently, has been designated A75-1, is the result of nine years of extensive breeding and testing at the university, assisted financially by a grant from the National Research Council of Canada. Apex is the result of a dozen or more highly rust-resistant hybrid wheats which have come out of the university breeding program.

Apex is so highly rust resistant that it can stand up to the severe epidemic conditions in southeastern Saskatchewan this year, its straw was clean and bright in comparison with the straw of Marquis. At the Kelso test Apex yielded at the rate of 24.2 bushels per acre of wheat weighing 56.6 pounds to the bushel and 34.8 bushels per acre whereas Marquis in the adjoining plots yielded at the rate of only seven bushels per acre of shrunken wheat weighing 43.3 pounds to the bushel and grading 1 Northern while the adjacent Marquis yielded 14.1 bushels per acre of wheat weighing only 45.1 pounds per bushel.

How was Apex originated? Doctor Harrington says this is a long story, for the foundational breeding was done years ago by E. S. McFadden, of South Dakota, and Dr. H. K. Hayes, of Minnesota, when they produced their rust resistant wheats H-44 and Double Cross, respectively. Doctor Harrington in 1926 crossed H-44 with Double Cross and in 1927 produced the "Triple Cross" from these hybrids with Marquis. From this triple cross, he and his assistants selected for several years and finally came up with the "Apex."

"The high rust resistance of Apex comes from the combination of the rust resistant in H-44 and the Double Cross, respectively. Doctor Harrington went on: "H-44 is the result of a cross between Viroslav and Marquis. Double Cross is the result of crossing Marquis with Humboldt durum and crossing the hybrids with Marquis X Kismet."

Thatcher is a sister of the Double Cross appearing in the pedigree of Apex, and like Apex, equals Marquis in milling and baking quality. Compared with Apex, Thatcher has shorter, stronger straw and is much less resistant to covered smut as well as less resistant to stem rust. On the other hand, Thatcher is highly rust resistant to loose smut and black chaff and in the southern Saskatchewan and Manitoba tests, has excelled in yield, strength and earliness.

These two new wheats, together with No. 716, which was produced by the Dominion Rust Laboratory at Winnipeg and announced recently at the Dominion department of agriculture, make three highly rust-resistant varieties which, by 1938, will probably replace Marquis over most of the rust area.

You'll Must Be Seized

Toronto proposes to ban the looting of motor horns between 11 p.m. and 7 a.m. About the only reason the police have for the ban is that some young fellows would have to resort to the courteous but more troublesome way of going out of their own way to the front door to let her home.

Plans develop reer when they are called. That is, according to experiments by experts at College Station, Tex.

THE LUCK OF THE IRISH—MAYBE!

The selection of the Liberal party to hold power for the next five years in Canada is evidence of a desire for lower tariffs. It may therefore be reasonably expected that next spring when the budget is brought down a revision of the duties imposed upon imports into the Dominion will be made.

The keynote of the Liberal campaign was lower tariffs. The high cost of living was emphasized from coast to coast. Liberal speakers maintained that tariff schedules were so high that they were injuring the welfare of even manufacturing centres by making the cost of living so high for workers.

The Conservative leaders held that without high tariffs Canada's industrial life would be effectively choked, and that in a world of high tariffs a lessening of Canada's duties was unthinkable.

Premier King will move cautiously in this matter. He has never been known to be precipitate. The big majority he has got will in itself be a handicap for there are so many Liberal constituencies that must not be injured. So out of a certain percentage of the additional duties applied during the Bennett regime may be all that will be done next spring.

A similar movement, if undertaken by other world countries, would do an immense amount of good in restoring world trade and fanning the faint flame of returning prosperity which is now visible amid the gloom. Maybe Premier King has the "luck of the Irish" and will see recurring good times synchronize with returning Liberal government in Canada.

EUROPE'S POWDER BARREL

No matter what may be the outcome of the Italo-Ethiopian embroilment there is almost sure to be an armament race unparalleled in the history of the world.

Great Britain, for years the leader in peace moves and undertakings calculated to reduce armaments both on land and sea, has forsaken that policy and is now launched on a program of increased naval and aeronautic power.

The British fleet is concentrating tremendous force in the Mediterranean Sea and consequently her sea power is deficient in other important localities. That deficiency, it is announced, is to be made up through an extensive building program.

Two thousand fighting planes have been ordered by the British government. British air strength has been admittedly weak and she is vulnerable as a result.

Britain has to control the Mediterranean or lose her grip on India and North Africa colonies.

Germany is re-arming. France hastens to meet the challenge from that quarter with huge military and naval expenditures.

Yugoslavia, Czechoslovakia, both anti-Italian, are strengthening their military might as fast as they can.

Spain, Turkey and Greece are piling up armaments in bustling haste. Vast Russia has been building up her military forces for years and is now redoubling her efforts.

Japan is now armed to the teeth. Her navy is the strongest, defensively, in the world and the prowess of her land forces is well-known. She is not slackening her efforts in the slightest degree.

All the ingredients for war are in the pot. The war pot is brewing. Every great power realizes the menace and is preparing.

"The nostrils of new wars flare wide
And sniff the dust of heroes greedily, and fling

An evil breath upon the world...
I feel the terror in the world to-night—
Unbridled lust of power, and bridled lust,
More cold but less merciless. The dust
Of perished legions drifts up the bright
And tender winds—a seal, blood-red
Upon man's last insanity."

CRUELTY TO CROWS

Professor Rowan, of the University of Alberta, is not playing fair with the crow tribe. It is positively indecent, in fact, the way the professor is disturbing the lives of the black marauders.

Last year Prof. Rowan started monkeying with the glands of a flock of crows through the medium of ultra-violet rays. He interfered to such an extent with the birds'

migratory habits that they did not know whether they were coming or going.

This year the university avant got hold of seventy five crows, held them back several weeks past the time they should have been on their migratory flight southward, and then shipped them to Winnipeg. As an added insult he painted the tails of all these crows a bright yellow.

No doubt about it Prof. Rowan is trying to get the crows into trouble. They'll either get lost or shot or both. A crow with a yellow tail is a fair target for anyone with a gun.

For centuries the crow family have been migrating southward at a certain period in the autumn and coming back in the spring. But if this University man keeps up his interference with Alberta crows he is liable to disturb a schedule that has taken numberless generations to perfect. By and by the crows will have to be handed a calendar and a trail southward blazed for them.

THE FEDERAL ELECTION —STATISTICALLY—

Those whose mental faculties take delight in perusing statistics will be interested in the breakdown of the electoral vote in Canada and Alberta, as it was registered on the 14th of October.

The victorious Liberal party received slightly better than 45 per cent of the total vote. The Conservatives received 30 per cent of the total vote registered. The two old parties received 75 per cent of the total vote registered and elected about 80 per cent of the total membership in the House of Commons.

The C.C.F. and the Reconstruction parties together obtained over 633,000 votes and only elected 9 members. The Reconstruction party, of course, suffered the most, although the C.C.F. saw their veterans in Alberta defeated en bloc.

The figures of the voting and the groups are hereafter given:

| Canada | | |
|----------------|--------------------|------------|
| | Candidates elected | Total vote |
| Liberals | 166 | 1,507,679 |
| Conservatives | 41 | 1,016,074 |
| C.C.F. | 8 | 299,359 |
| Reconstruction | 1 | 334,411 |
| Social Credit | 17 | 100,165 |
| Others | | 66,848 |
| | | 3,325,421 |
| Alberta | | |
| Social Credit | 15 | 45,266 |
| Liberals | 1 | 28,075 |
| Conservatives | 1 | 22,188 |
| C. C. F. | 0 | 14,061 |
| Reconstruction | 0 | 1,343 |
| Others | 0 | 1,288 |
| | | 121,221 |

NOW YOU TELL ONE!

Among Ananias stories, the following is a tale of a hunting dog as told to the Winnipeg Free Press, and retold in many other papers:

I believe I had the smartest dog I ever heard of. He was a pointer and all the time I had him (forty years) he was never known to make a mistake. Of course there were always sceptical folk who followed us around day after day hoping the dog would commit an error, but he always fooled 'em.

One Sunday I went for a walk in the park, with my dog running ahead. Suddenly he stopped and pointed. I went ahead but could find no birds. Convinced that at last he had made a mistake, I called him and started on. At once the dog stopped and pointed again at the same place.

I couldn't see anything resembling a bird except an old gentleman sitting on a park bench, and, feeling sure the dog could not be wholly mistaken, I asked him if by chance he had any birds in his pockets. He said 'no' in a pained voice, and I was stuck for I could not believe my dog could make a mistake twice on the same day.

Suddenly I had an idea. I asked the old fellow his name. Imagine my surprise and relief when he said 'Partridge'.

THE FARMER MAN . . . A SANTA CLAUS

About a week ago we sold a few choice lambs, which brought us 4c a pound.

A few days later, we paid seven and a half times that price for 5 little chops cut out of one of the bunch.

Of course the farmer man has always played the part of Santa Claus to the rest of the human race, but although we've recently heard a lot concerning a change in this condition, we aren't quite so hopeful as others—The Scotch Philosopher.

Ten Minutes with the Scotch Philosopher

The destructive nature of grizzly bears, may be judged, in a measure, by the one recently shot by the ranger, Fred Nash, in the upper reaches of the Highwood.

Th's huge monster, weighing 800 lbs., was said to have killed over 30 head of fall grown cattle and, no doubt, many deer as well.

This makes the third grizzly to fall before the ranger's gun this year, all within a few miles of his own cabin.

Fred, who is a genial Englishman, has always a kindly welcome for all who enter his domain, and although, fishing in the Highwood is not so good as in former years, it is still a very desirable place to spend a vacation. In late summer, when many people camp along the beautiful valley, the wild flowers are at their best, and nowhere in this wide world can such a variety of wild blossoms be found.

The last time we were there was in '28 and, on that occasion, enjoyed the company of H. H. Foster, editor of one of America's noted sporting journals, and other friends.

It was unfortunate that, on the third night out, a severe blizzard came sweeping down from the mountains, nearly a foot of snow falling in the short space of two hours.

The party finally got back to Hith River, but only after digging and shovelling on the road for nearly a round of the clock.

One of the fellows from the East was a skilled photographer and his motorist, used in conjunction with Bellis' new articles, gave to a great host of Americans, little glimpses of the charming scenery along the Highwood trail.

When one makes a follow it hits him, he is apt to receive many a jolt from strange quarters, like the following as an amusing sample.

While serving His Majesty's Canadian Government in a humble capacity on election day, it became the sad duty of a farmer to inform a handsome young lady that she was not qualified to vote. "Oh, alright, old-timer," she replied, "I'll go back to the caboose and start what you should be doing now, swatting flies!" Then, wheeling around on her high-heeled shoes, she walked haughtily to the door, cracked the hen old lid, and buzzed off to her cock car.

The one who had borne the full weight of her satire looked at the laughing folks around and exclaimed: "The guy who wrote that staid about the 'female of the species' sure knew his petticoats!"

About a week ago we sold a few choice lambs, which brought us 4c a pound.

A few days later we paid seven and a half times that price for 5 little chops cut out of one of the bunch.

Of course the farmer man has always played the part of Santa Claus to the rest of the human race, but although we've recently heard a lot

SPEAKING OF PRINTING

There are some printing jobs which can be executed a lot cheaper in the larger city shops. These shops are equipped with the most modern automatic presses and other machinery which the local printer can never hope to buy because his business is not large enough to merit it. But on the whole, there is a mistaken idea about the purchase of stationery. Local business people will request the printing office for a price of one thousand for a set of a certain kind which for argument's sake we shall say will cost six dollars. The customer places the order. At a later date a stationery salesman comes along, sees the form and volunteers the information that he can supply the same form for four dollars a thousand in five thousand lots—so could the local printer, but unfortunately he is seldom asked for more than a couple of thousand on any job, and if larger quantities are suggested the reply is: "A couple of thousand will last us a long time."—Drumheller Mail.

HUSSAR

HUSSAR, October 23—There will be an apron and tidd dance at the Atlas School on November 22nd.

The Annual Masquerade Dance will take place on November 10th. Under the auspices of the Ladies' Aid there will be an entertainment of readings and music at the hall on November 8th.

Rabyn, Orabelle and Lucell Snellings and Ivan and Maxville Anderson motored to Bassano on Wednesday.

Mr. and Mrs. G. Lawrie were Bassano visitors on Tuesday evening. Mr. and Mrs. H. D. Brown and Ivan Anderson motored to Bassano on Thursday afternoon.

Mrs. C. T. Armstrong was a Seattle visitor last week.

Mr. and Mrs. H. A. Treend and Mr. and Mrs. W. A. Treacy left on Saturday for a trip to Seattle.

E. J. Bell and H. Allen motored to Beynon on Thursday evening to get Jason Bell, who has been working there all fall.

T. H. Clarke came home on Thursday with a brand new car. L. M. Clark has also purchased a car recently.

Art Flanagan and T. F. Snyder motored to Drumheller on Tuesday.

Mrs. K. Shaffer of Tutor visited with Mrs. J. Hoeft and Betty Lea from Wednesday to Sunday. Mr. K. Shaffer motored over to get her.

Miss Jessie Elliott motored down from Calgary on Saturday with Miss Margaret Coleman, George Hawkins and William Frank. Her friends returned to Calgary on Monday, but Jessie visited with her parents. Mr. and Mrs. J. V. Elliott until Friday. Mr. Elliott and Marjorie took her back to Calgary.

Mrs. Shiellina, Sr. returned on Saturday from Calgary.

Miss Dorothy LeGrandeur, who has been with her sister Margaret at Rocky Mountain House, returned on Monday with Mr. F. T. Armstrong. Mr. and Mrs. L. L. Woodward, Mr. Ed. Level of Spokane, and Jason Bell motored to Calgary on Monday.

Mrs. Marjorie Snellings and infant daughter, and Mrs. A. A. Anderson, returned from Bassano on Monday. On Friday evening, the First Hussar Troop of Boy Scouts held a dance to raise funds for their work. They took full charge of the preparations and their mothers served the supper. There was a good turnout and the boys realized a fair return for their labor.

Phillip Pugh returned from Rockyford on Thursday.

E. J. Bell and E. J. Grant motored to Calgary on Saturday.

There will be a foot supper and a dance given by the Social Credit party here on Friday evening, in honor of Mr. W. E. Cane, L. P. Schofield, C. Blake and F. J. Mueller, Mr. and Mrs. W. R. McLean and Bobby Bruce and Margaret Bell motored up from Calgary on Sunday.

TEN MINUTES WITH THE

SCOTCH

PHILOSOPHER

CONTINUED

Something a change in this condition, we aren't quite so hopeful as others.

The secret break in the wheat market and the reported resignation of J. I. McFarland, two days after the election, must have caused a lot of people to meditate on the queer events that invariably follow change of government. As all the world knows, the Liberal party views the wheat harvest and its splendid chinamen with infinitely eyes and, while out doubt, many changes will be made at the request of Mr. King.

Whether there will be for the up-lift or downfall of its western producer, time alone can tell. Meanwhile we don't care a hoot for the plotting of either big men or little mice.

Aided by a fortunate circumstance, we've got 12 tons of tobacco and five pounds of cod laid away. These, with a superabundance of Scotch, Murphy's and sauer kraut material, will keep the spark of life flickering in our frail frame until "next year" comes along with a bang. Of course we'd love to have a wee drop in the bottle for the morning. But as farmers and their spouses can tell, the price received for "next year" does not permit one single purchase of the Government Vendor's temporary cure for the blues.

Now we'll host the cat out and call it a day.

Ed. Note: Evidently "Mistie," the dog, remains in at nights.

THE MODERN CAR

THE NEW FORD V-8 FOR 1936

Why do we say The New Ford V-8 for 1936?

What is new about it?

Of course, the newest engine in the low-price car field is still the V-8 engine. Since Ford made it available to all car owners (keeping it as economical as cars with fewer cylinders) the Ford V-8 has been the newest engine on the market, and remains the newest for 1936.

You may buy a car on "talking points"—some specially advertised feature "with the car three in one"—but other all it is the engine car buy when you buy a car. Hence we put the engine first.

Other new points about the car make a long list.

Its lines are much more beautiful. Its hood is longer and lower forward over the distinctive new radiator grille, giving the car a length and grace that are instantly impressive. Its fenders are larger, with a wide line. Horns are concealed behind circular headlamps. New wheels.

Ford upholstery—of a quality of sterling quality and excellent to be as rich and enduring. The appointments of the car have a new touch of refinement. There

is no question about the increased beauty of the Ford V-8 for 1936.

In more practical matters, many improvements have been made.

Steering is made easier by a new steering gear shaft. The cooling system circulates 4½ gallons of water through a new, larger radiator. Natural thermostat action is assisted by two centrifugal water pumps. New style hood leaves permit a rapid air flow around the engine.

Engine quietness of Ford means the new shift lever now travels a shorter distance.

The two qualities you want in brakes—Brakes that stop the car with ease and certainty. Ford Super Safety Brakes of Ford tested, load proof, mechanical design.

Safety—as always—in the electrically welded-pipe steel body. Safety Glass—full use of not a sheet of it. "Horn" cover system and full lights. Inexpensive glass vision protected the safety of the families.

A car you can drive without strain all day, if you also in city or country. New V-8 holds the record, records to the

driver's touch like a well-trained horse. You don't have to "push" or "light" the Ford V-8—driver and car easily get on terms of good understanding with each other.

An engine has much to do with the roominess of a car. Very much indeed. A long engine uses up car space. The compact V-8 engine permits much of the ordinary engine space to be used by passengers.

It really is a great car in every way. This 1936 Ford V-8—the finest, safest, most dependable Ford car ever built. Get complete details at your nearest Ford dealer.

LOW FORD V-8 PRICES

TEN BODY TYPES—Coupe (5 windows), \$665. Tudor Sedan, \$675. Fordor Sedan, \$775. DECADE—Roadster (with rumble seat), \$725. Coupe (5 windows), \$725. Coupe (5 windows), \$710. Phaeton, \$710. SYNOPSIS

Nancy Nelson is a sub-bub, a gray, irresponsible girl of nineteen, with no care beyond the choice of her next costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he has, and his family is faced with the necessity of a simpler style of living.

At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tabbs had told her to follow. A tree comes along the road, driven by Matthew Adams, and she takes him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's.

Adam tells Nancy that his brother Luke has broken his leg and that Jack Nelson has been hired to help with Luke's leg gets better. With Jack away, Nancy decides to go to a luncheon, and she takes him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's.

Margaret reached for the paper, consulted almost automatically. "A heaping tablespoonful to every cup, Phil." Then as he ran to join his father, she fell on these arresting headlines:

TERRIFIC BLIZZARD SWEEPS COLORADO PLAINS. BUS FULL OF CHILDREN SAVAGED BY TWO YOUNG PEOPLE. A SEARCH OF HELP BECAME CONFUSED AND DIED IN THE NIGHT.

"Denver, Colo., March 27. (AP) A story of a bus full of children in a school bus yesterday afternoon in a school bus at the Colorado prairie, when Mrs. Nelson, nineteen, popular sub-bub, daughter of Mr. and Mrs. James C. Nelson of Boston and cousin of Miss Columbine Nelson, pioneer resident of Pine Ridge, Colorado, stripped to her underwear in order to put her clothes on children who were freezing to death before her eyes, while her brother Jack, seventeen, facing the blizzard, was bringing help, succeeded in reaching a distant ranch house after offering no word of the whereabouts of the missing bus. Without the heroic action of these two young people, sixteen children would undoubtedly have perished.

Margaret read no further because her hands were shaking so that she could not see the type; but she managed to catch a call that somehow startled her husband; and that for every moment the front door bell rang.

John sat the coffee pot on the stove, and said: "You answer that bell, son. I'll see what Mother wants."

Margaret was lying back against the pillows, her face colorless. One hand still clutched the paper, and a faint gesture told her husband he was to read it. He sat on the bed, and, strangely, his daughters' name started up at him as he took the sheet, even before he saw the headlines.

"Nancy Nelson . . . stripped to her underwear . . . brother Jack . . . collapsed . . ."

"It's a collapse," cried Phil, bursting into the room in great excitement. "Maybe it's from Cousin Columbine asking me to visit her."

Jack's coat. Without Tom's help, Nancy told herself, she could not endure much longer. "That boy was a hero. How many times had she seen him, when on the brink of drowning, pull himself together valiantly to help the younger ones. Why, he was drowny now, poor darling! His task accomplished, he had slumped onto that huddled mass upon the floor. Oh, he must go under! Not brave like the Tom Osgood! Nancy dragged herself up, shaking the boy with all her falling strength.

"Wake up, Tommy! I need you! We must keep these children. Don't go to sleep. Tom . . . Keep fighting . . . fighting . . ."

An hour later when the bus door snapped opened and Matthew Adams, his uncle, and two grim-faced fathers stepped fearfully inside, Nancy's fur coat was covering a mound of children, while the girl herself, almost too spent to realize that help had come, sat on the floor amid a sweater covering her in silk under-ward, nodding, as she rubbed mechanically at a small boy's frozen feet.

CHAPTER XIX.

Such events are "news" to the Associated Press. On the morning after that momentous blizzard James Nelson arose early, for Margaret was convalescing from an attack of flu, and the woman who had been coming in to help was also ill. Hence it did not occur to Dad to get the family breakfast; but before beginning this unaccustomed duty he stopped to take in his morning paper.

When he came early to Edgemore. The air, James noticed, was almost blank. And he had a melodious whistle, and Mendelssohn's "Spring Song" was on his lips when, suddenly realizing that time was fleeting, he turned toward the kitchen.

"Hello, there!" greeted Phil on his way downstairs, and when James tossed him the paper without looking at it.

"Take that up to your mother. Phil may like to glance at the news before I go. But come right back, sonny. I need a couple of aspirin. And ask how much coffee I ought to use."

Margaret looked up happily as the boy entered her room.

"It's good to hear Dad's whistle, Jack," she said, reading the long months when that cheerful sound was silenced. "I feel like a slacker while he's away, but I'll be a better doctor says I'm not to stir for another week. Thank goodness Aunt Louise will be out to-night! Don't stop reading the paper, Phil, and tell your father a heaping tablespoonful."

"Look here!" The small boy's eyes were bright with interest. "There's been a terrific blizzard in Colorado. I wonder if it was near Cousin Columbine's."

Margaret reached for the paper, consulted almost automatically. "A heaping tablespoonful to every cup, Phil." Then as he ran to join his father, she fell on these arresting headlines:

TERRIFIC BLIZZARD SWEEPS COLORADO PLAINS. BUS FULL OF CHILDREN SAVAGED BY TWO YOUNG PEOPLE. A SEARCH OF HELP BECAME CONFUSED AND DIED IN THE NIGHT.

"Denver, Colo., March 27. (AP) A story of a bus full of children in a school bus yesterday afternoon in a school bus at the Colorado prairie, when Mrs. Nelson, nineteen, popular sub-bub, daughter of Mr. and Mrs. James C. Nelson of Boston and cousin of Miss Columbine Nelson, pioneer resident of Pine Ridge, Colorado, stripped to her underwear in order to put her clothes on children who were freezing to death before her eyes, while her brother Jack, seventeen, facing the blizzard, was bringing help, succeeded in reaching a distant ranch house after offering no word of the whereabouts of the missing bus. Without the heroic action of these two young people, sixteen children would undoubtedly have perished.

Margaret read no further because her hands were shaking so that she could not see the type; but she managed to catch a call that somehow startled her husband; and that for every moment the front door bell rang.

John sat the coffee pot on the stove, and said: "You answer that bell, son. I'll see what Mother wants."

Margaret was lying back against the pillows, her face colorless. One hand still clutched the paper, and a faint gesture told her husband he was to read it. He sat on the bed, and, strangely, his daughters' name started up at him as he took the sheet, even before he saw the headlines.

"Nancy Nelson . . . stripped to her underwear . . . brother Jack . . . collapsed . . ."

"It's a collapse," cried Phil, bursting into the room in great excitement. "Maybe it's from Cousin Columbine asking me to visit her."

Open it quick, what's that? Why—what's the matter? Is Mother sick again? Gosh! There's the telephone. What's it have to ring for now?

As he sped away, his father started down at the yellow envelope. For a moment it seemed as if he could not face the contents. Then, braving himself inwardly, he tore it open, eyes gleaming the signature before he read: "THE UNIVERSITY OF ALABAMA BY REPORTS IN PAPERS STOP BOTH WILL HAVE BEST OF CARE AT HOSPITAL STOP STOP MARKING GOOD FIGHT AGAINST PNEUMONIA AND ALL FORMS OF COUGHS STOP STOP TELEGRAPH IF COMING STOP WILL BE AGAIN AT NOON AFTER TALKING WITH DOCTOR STOP AM PRIDE OF OUR CHILDREN COLUMBINE NELSON."

Margaret, watching his tense face, cried out: "Is—is it—"

"Not that!" James broke in quickly. "Not that, dear!" and read the message, his voice trembling. Then the small boy was back, calling as he ran up the stairs: "It's Aunt Lou on the telephone. She wants you, Dad. Where's that telegram? Was it—"

When James returned five minutes later there was a bit more color in Margaret's face, and Phil, avidly perusing the story, lifted his head from the newspaper to exclaim: "Gee, Daddy! Jack went to the hospital, you socks! He'd put 'em on a little feller that was freezing. And Nance had given her stockings to some one too, and her dress! Her fur coat and everything. She had one of the kids' sweaters over her slip. She got unconscious soon as they found 'em. One of those Adam fellows got their first. They'd been to his uncle's ranch and got caught in the blizzard on the way home and collided with a bus. It says they showed unbelievable heroism; and the driver was found a mile off the road, and his legs are frozen to—"

He ceased abruptly at a warning glance from his father.

"That's enough now, Phil. Louise had seen the paper, Margaret, and was rather worked up—for Louise. Another teacher will take her classes and start catch colds from here. I'll stay until she comes, dear. She asked if we were going to Colorado, didn't she?"

"I feel as if I must, Jim," said Margaret weakly. "If Jack has pneumonia he's been grown so fast that—"

"The last letter said he'd gained twelve pounds," the little boy reminded them, "and Nance said he'd never looked better."

"I know, but—"

Her lips trembled, and James interrupted: "I understand how you feel, Margaret. It's impossible for you to travel now. This flu's so treacherous if one gets up too soon. But I'll drop everything and go myself unless the next telegram is reassuring. I promise that."

"Is pneumonia a very bad thing to have?" questioned Phil soberly.

"Pretty bad," said Margaret, thinking that should Jack not weather it his mother could scarcely reach him any more. "You close your eyes, Margaret, and I'll bring you a glass of water. You'll feel stronger when you've had something to eat."

Louise Nelson sat afterwards that she spent that entire day answering telephone and door bells. The news spread fast, and friends and neighbors came to see. A crowd of Nancy's schoolmates called up from town, as well as some of the "big boys." There were calls from Peter asking if Jack was as badly off as the papers intimated, and it seemed to the distracted woman that she had no time in which to cheer the invalid.

Cousin Columbine was better than her word, the second message arriving almost an hour before promised. Louise called her brother's office and read it to him.

"It's addressed to you, Jim. She says: 'Declare that thing, either better, and considering how far away you are, advises you not to start immediately. Jack doing as well as can be expected. Nancy suffering greatly but her courage is good and will increase as weakness wears away. Letter follows this with write and wire daily for the present. Shall stay near Gloucester Hospital as address me there?'"

"Then Dad won't go?" asked Phil, hovering near as his aunt telephoned. She shook her head.

"Are they both better?" Aunt Louise nodded because speech came hard. The message was hopeful, yet she seemed to read something between the lines. Pneumonia, she thought, sometimes travels faster than a railroad train. Was that why the doctor advised Jack's parents not to come?

(To Be Continued)

Indian doctors of Brazil use ants to sew up wounds; the wound held together while the ant bites into the flesh. The insect is then bled, but the jaws do not release their hold.

Odd Jobs In Hollywood

One Man Makes All The Colors For Spooky Films

In the Hollywood studio is a man who has worked 10 years and he has as good as a film star. He works at night. Every night he fixes and sharpens the teeth of 200 saws for the army of carpenters using them the next day. His is only one of the many odd jobs that go to the making of a picture. There is the "color spinner," for example. He makes color for these "spooky" films. They turn out in Hollywood every now and then. He spins them out of a chemical mixture that is formed into gossamer strands by a strange electrical machine. When a film is to be shot from an actor's hand or a rope to be snapped by a bullet fired in Rex Briscoe, who has been doing this sort of thing for more than 10 years, and who has never missed yet. Perhaps the strangest job is that of Herman Frosch. He has to listen to music. Being the Copyright expert, he can tell who wrote any few bars and where it comes from. That prevents the studio lifting music for which they should be asked to pay an exorbitant sum later.

Sapphire Is Favorite

Selected As Betrothal Stone By Brides Of King's Sons

The brides of sons of the King and Queen have been at one in their choice of betrothal stones, says the Glasgow Herald. Lady Elizabeth Bowes-Lyon set the example, which was followed a year ago by Princess Marina of Greece, and has been copied now by Lady Alice Scott. No stone is as beautiful as the true blue sapphire, especially when its lights are enhanced by diamond setting. The Princess Royal selected an emerald engagement ring, probably because so many sapphire stones were included in the Clarenceau jewels, which were a wedding present from her bridegroom.

Prize For Short Story

Imperial Order Daughters of the Empire has announced a prize of \$50, offered by Echos, the official magazine in a short story competition. British residents in Canada may submit stories before Feb. 1 of 2000 to 5000 words, preferably dealing with Canadian life.

Some men overwork themselves trying to live without work.
